Industrial plants in modular design

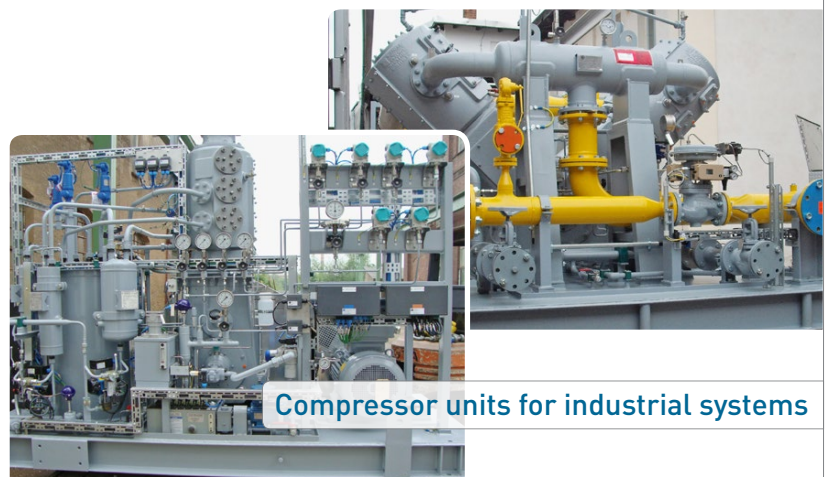

Industriefabrik Schneider GmbH is a company in the field of mechanical engineering and construction. We combine first-class industrial services with high-performance construction. In the field of machinery and plant engineering we offer the production of industrial equipment in modular design.

For more than 20 years now, Industriefabrik Schneider GmbH has been developing and manufacturing a variety of reliable, efficient and robust plants at our location in Großzöberitz. Benefit from our experience and know-how in machinery and plant engineering, in particular in the field of steam.

Skid Mounted Plants from Industriefabrik Schneider

- » Short production time, fast delivery
- » Compact design, low space requirement
- » Simple to transport, easy to install and relocate
- » Minimal maintenance needed, simple exchange of parts
- » Minimized production loss due to short installation period

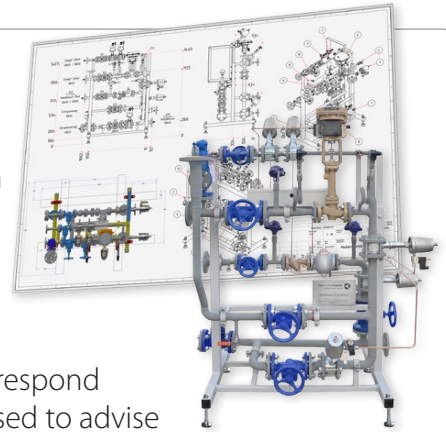

Compressor units for industrial systems

Construction and technical documentation

With our in-house design and documentation department, we can support you from the initial idea to the safe operation of the entire plant. Customers trust us in machinery and plant manufacturing with complex unique pieces as well as constructions in series production in larger quantities.

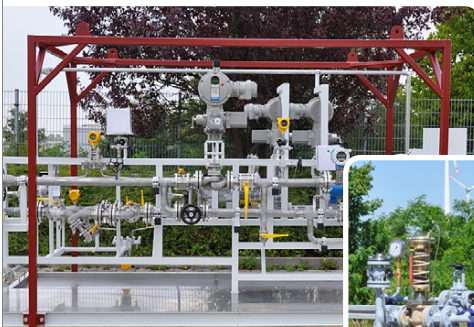

The flexible and modern structure of our company means we can respond satisfactorily to our customers requests and needs. We will be pleased to advise you in detail and develop hand in hand with you innovative customised solutions for your production plants, workshops and factories.

INDUSTRIEFABRIK
VALVES . FITTINGS . PLANTS . STRAINERS

- Dosing systems for the chemical industry
- Valve skid units for the oil and gas industry
- Heat exchanger for the food industry
- High pressure pumping stations for water management
- Steam packages for the tire industry

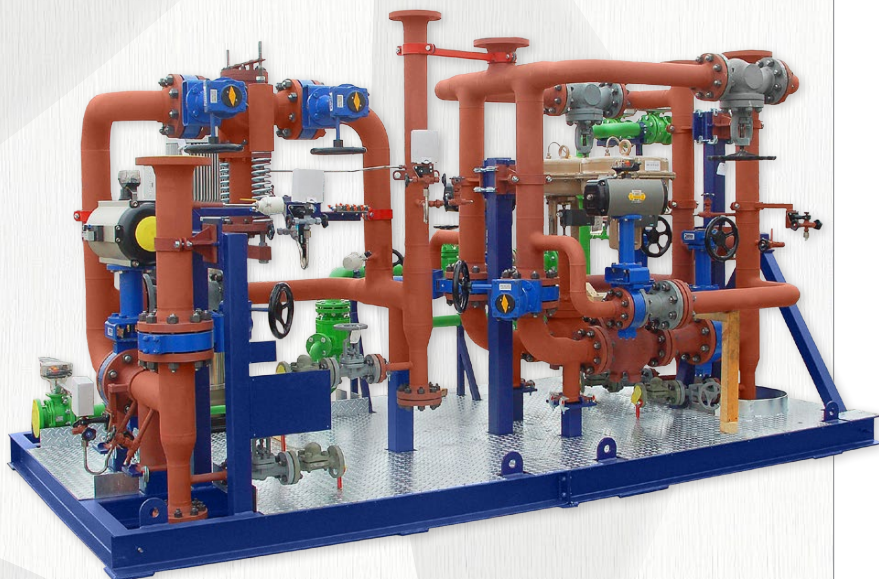

Pumping stations for water management

Compressor unit
for biogas systems

Modular process skids

Oil cooling system
for compressor units

Redundant pumping station
for water treatment

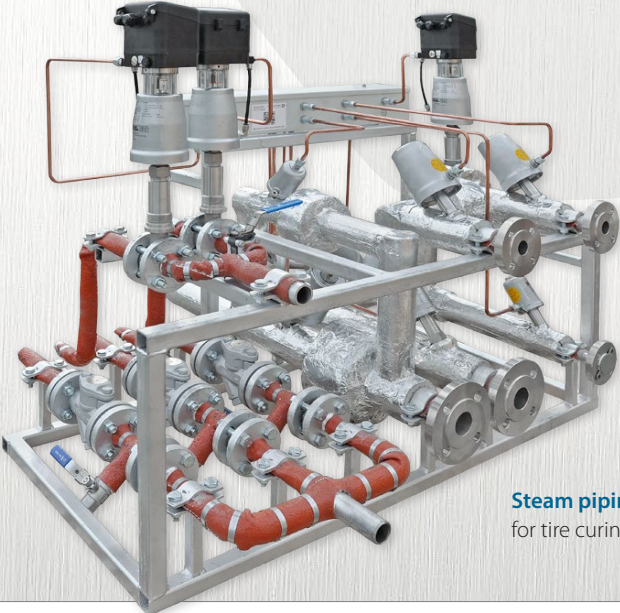

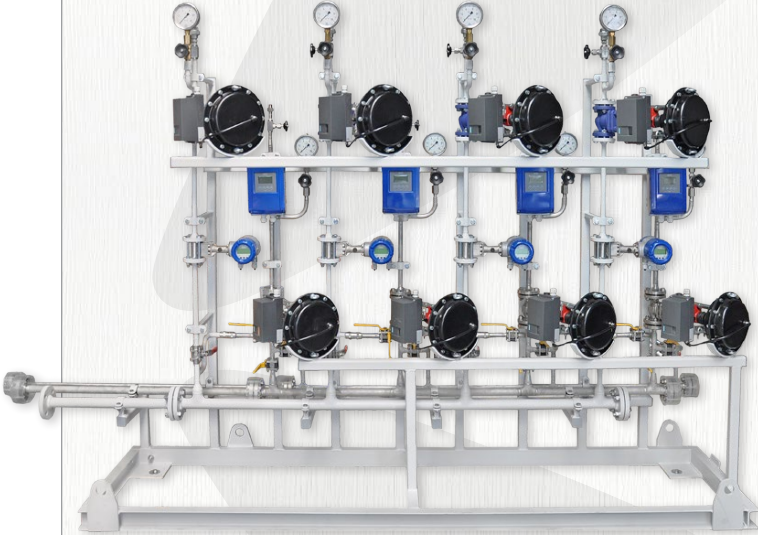

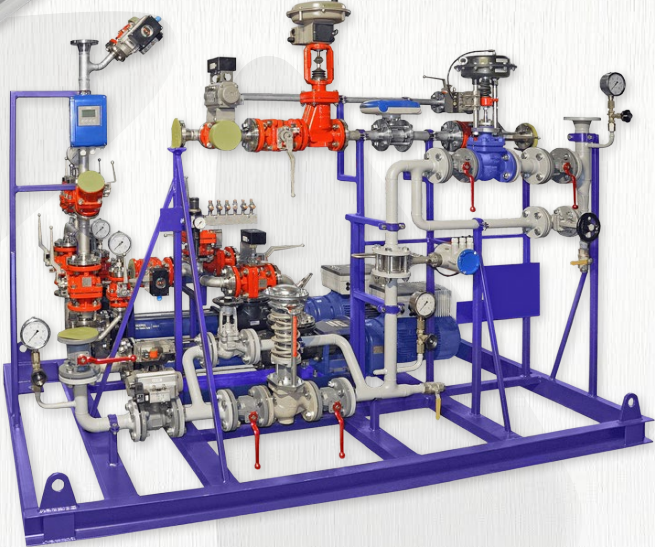

Skid mounted plants

Made in Germany

Valve skid units

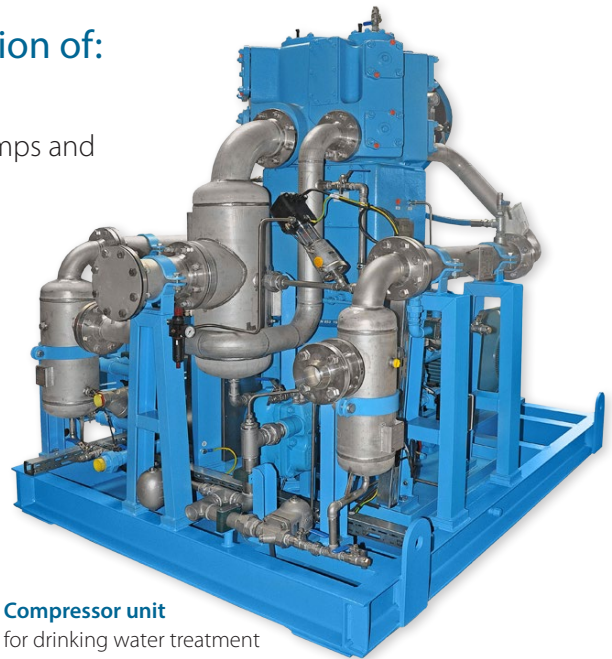

Steam piping package
for tire curing presses

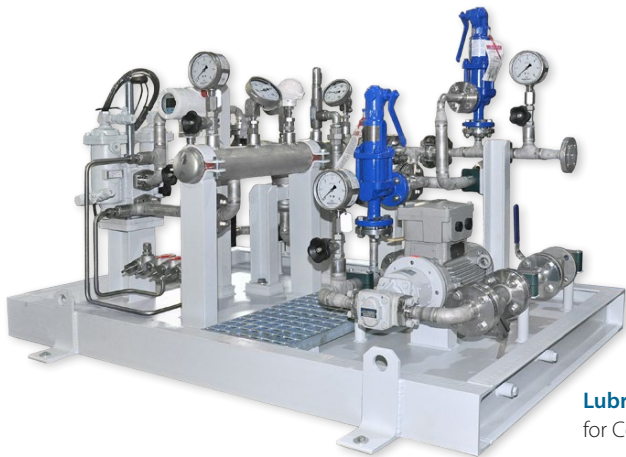

Skid mounted plants include the installation of:

- » welded and painted mounting frame
- » Pipes, strainers, pressure vessels, compressor units, pumps and industrial fittings
- » configure from safety valves, positioners, pressure transducers, pressure switches, ...
- » Insulation and cabling

We organize the professional transportation with truck, train, ship or aircraft and accept all shipping formalities for you.

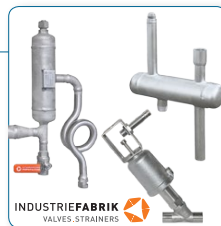

Compressor unit
for drinking water treatment

Lubricating oil station
for Compressor units

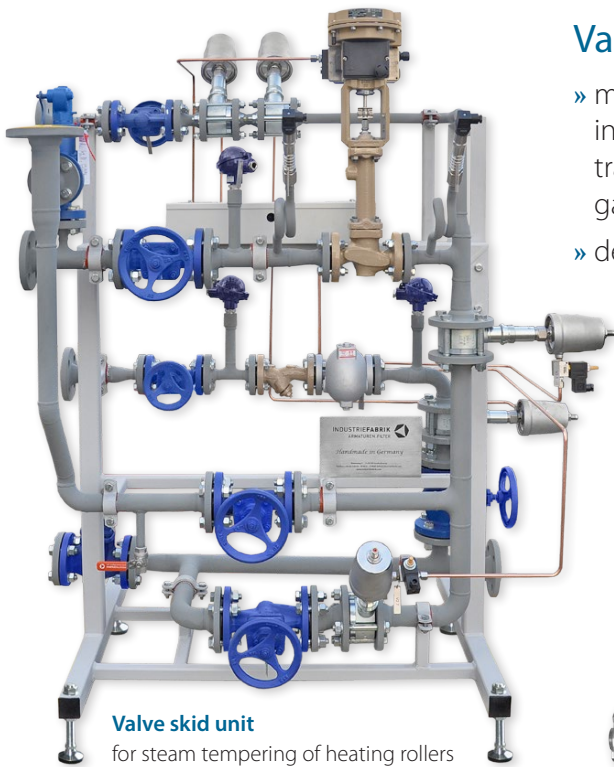

Why industrial plants from Industriefabrik?

- » Long time experience in plant engineering with qualified employees
- » In-house construction and documentation department with customer project support
- » Components from its own production
- » Quality valves renowned manufacturer
- » High efficiently temperature design by quality thermal insulation
- » Online shop for industrial fittings and spare parts for your projects

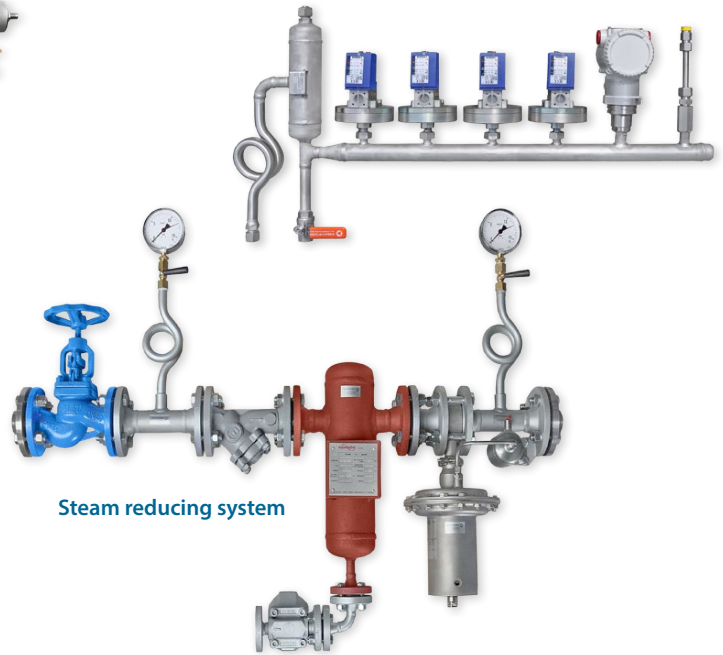

Valve skid units / Valve assemblies

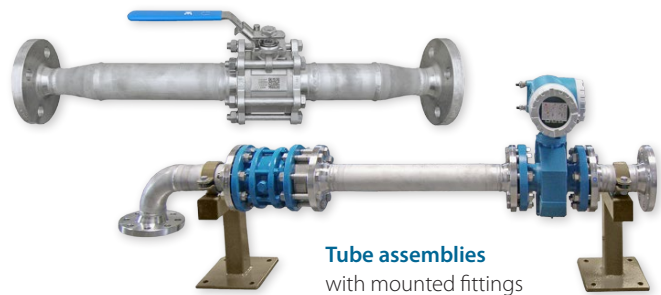

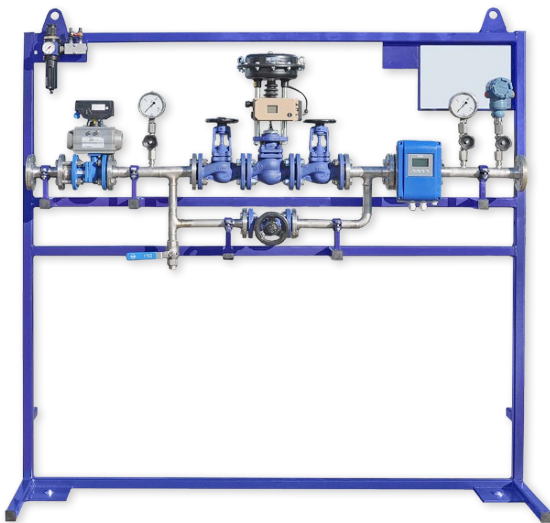

- » manufacturing of valve assemblies with integrated industrial fittings such as automated ball valves, pressure transducer, stop valves, strainers, check valves, pressure gauges, thermometers, ...
- » delivery as individual pieces or volume production

Valve skid unit
for steam tempering of heating rollers

Steam reducing system

Tube assemblies
with mounted fittings

High efficiently thermal insulation

- » **HITLIN™** – High temperature E-glass fiber insulation
- » **marsoflex®** – Pyro heat protection hose and flexible hose lines
- » **Conti® Thermo-Protect** Ultra-flexible insulation system
- » **Industriefabrik** – Insulation jackets for industrial valves
